

VI-2201

PoE injector, midspan for 15W and 30W

- IP/PoE Midspan
- 1 channel
- PoE IEEE802.3af and IEEE802.3at

IP- / PoE-Midspan

The VI-2201 midspan allows PoE end devices (PoE-PD) to be supplied with PoE power in accordance with IEEE802.3af and IEEE802.3at. The device is operated with a mains voltage of 230VAC. The midspan can be used in table or wall mounting.

Technical data

General properties

supply voltage	100-240VAC, 50/60Hz
power consumption	Max. 35W
MTBF	
operating temperature	0 to 40°C
dissipation loss	12 BTU/h
dimensions	117 x 62 x 34mm LxWxH, length including plugs, without mounting tabs
weight	Gross weight: 0.4kg Net weight: 0.3kg

interfaces

copper ports	Data port: 10/100/1000BaseT, RJ45 Data and PoE port: 10/100/1000BaseT, RJ45
